SUMMARY

Computer Science undergraduate with hands-on experience in Data Structures & Algorithms, object-oriented programming, and fullstack development (Python, Java, C++, React). Skilled in Git-based version control, debugging, and building data-driven applications end to end. Seeking a Software Development Engineer (SDE) Intern role to apply strong problem-solving and coding fundamentals to real-world engineering challenges.

SKILLS

Languages: Python, Java, C++, Kotlin

Web Technologies: HTML, CSS, React.js

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, SQL, Algorithm Design & Analysis

Tools & Practices: Git, GitHub, Version Control, Debugging, Data Analysis, Agile/Collaborative Development

Soft Skills: Communication, Teamwork, Self-Motivation, Discipline, Time Management

TRAINING

Winter Training – Data Structures & Algorithms, Programming Pathshala Jan – Feb 2025

- Completed intensive training in Data Structures & Algorithms, covering arrays, trees, graphs, sorting/searching, and time-space complexity analysis
- Built efficient, memory-conscious solutions applying object-oriented programming (OOP) principles that mirror production-quality coding practices
- Practiced clean, modular coding standards aligned with real-world software engineering environments

Summer Training – C++ Programming, Lovely Professional University May – July 2024

- Completed in-depth C++ training focused on writing optimized, scalable code for performance-critical applications
- Applied recursion, dynamic memory management, and OOP concepts to solve algorithmic problems
- Maintained strong discipline and attention to detail throughout intensive technical coursework

PROJECTS

Twitter Sales Data Analysis Nov 2024

- Built a Python-based data analysis pipeline to process Twitter ad and promotion datasets, identifying peak engagement windows to optimize campaign timing and ROI
- Computed monthly revenue from Twitter-driven sales to support marketing budget allocation decisions
- Ran comparative analysis across campaign types and demographics to surface actionable performance insights

Automated Climate Monitoring System for Smart Agriculture Jan 2024

- Built a full-stack Android application integrated with Arduino/ESP32 sensor hardware for real-time temperature, humidity, and soil-moisture monitoring
- Implemented real-time data transmission via Bluetooth/Wi-Fi and designed a responsive, user-friendly Android UI
- Developed a smart alerting system to trigger irrigation and crop-management decisions based on live sensor data

Online Voting System (Python) Mar 2023

- Designed and built a secure, full-stack online voting application covering user registration, authentication, and voting workflows
- Implemented secure login and authentication logic to verify voter identity and prevent duplicate or fraudulent votes
- Built real-time vote tallying and result generation with secure, persistent data storage

CERTIFICATIONS

- Excel Skills for Business — Coursera (Apr 2024)
- Data Analysis with Tableau — Coursera (Nov 2024)
- R Programming — Coursera (May 2024)
- Approximation Algorithms and Linear Programming — Coursera (Jun 2023)

EDUCATION

Lovely Professional University — B.Tech, Computer Science and Engineering Aug 2022 – Present
CGPA: 6.16

Lala Rajpat Rai Se. Sr. School — Intermediate (PCM) Apr 2019 – Mar 2021
Percentage: 65%

D.A.V Public School Koyla Nagar — Matriculation Apr 2018 – Mar 2019
Percentage: 75%
